

Rapid Response – Minimal Downtime

Service Team

APC Integration offers a professional engineering maintenance service, to attend to your machine control breakdown or routine service requirements.

We can provide a multi-discipline mobile workforce to service a growing customer base, throughout Australasia.

Our APCI engineers' skills and knowledge are always abreast of the latest technologies and applications.

24 hour Support

Customers who take advantage of a service contract can have the option of 24 hour 7 days a week guaranteed availability.

Preventative Maintenance

Ensures that you minimise your unexpected breakdowns. Regular visits to inspect and service your machines in including:

- CNC HDD backup
- Backup battery replacement
- Control Cable inspection and replacement
- Servo system tuning

Safety System Validation

Is your plant safety system still performing as designed, does it meet current standards? Working with your plant production staff, APCI can guide you through the Risk Assessment process. With reference to AS4024 - 2006, AS60204 and other relevant standards.

Industries

APCI has experience in Automotive, Food and Beverage, Rail and Bulk Logistics, Manufacturing, Mining, Water, Theatre and Event Automation. With a wide range of expertise we are able to assist you with all your service needs.

Service Agents for

CNC Machinery Repairs and Upgrades

APCI are the appointed South Australian service and repair agents for CNC Design providing breakdown service, maintenance and upgrades for your **Siemens CNC machines**.

Addison Mckee Tube Benders

APCI are the Australasian service agents for Addison Mckee tube bending machinery. Providing service and repair to **Addison Mckee tube bending machines** throughout Australia and New Zealand.

Maxitec Sheetmetal Technologies

APCI are the appointed South Australian service agents for **Maxitec**. Suppliers of Finnpower punch presses and Gaspirini press brakes and laser cutters.

ABB Fertiliser

The APCI service team has an annual contract with ABB Fertiliser. Every year, prior to the first autumn rains APCI recalibrate the five ABB Fertiliser blending plants at Port Lincoln, Wallaroo, Ardrossan, Port Adelaide and Geelong. Each year the property of the various fertiliser products varies. This ensures that the product mix the farmer expects is what he gets.

Theatre

APCI's **StageMaster** theatre control system is used throughout the world. As shows move from theatre to theatre APCI are there to give technical assistance the control systems when required.
